## Highlights of This Issue 205

### CELL CYCLE AND SENESCENCE

#### Nuclear Expression of β-Catenin Promotes RB Stability and Resistance to TNF-Induced Apoptosis in Colon Cancer Cells

Jinbo Han, Rossana C. Soletti, Anil Sadarangani, Priya Sridevi, Michael E. Ramirez, Lars Eckmann, Helena L. Borges, and Jean Y.J. Wang

### DNA DAMAGE AND REPAIR

#### Microenvironmental Regulation of BRCA1 Gene Expression by c-Jun and Fra2 in Premalignant Human Ovarian Surface Epithelial Cells

Lixin Zhou, Marcia Graves, Gwen MacDonald, Jane Cipollone, Christopher R. Mueller, and Calvin D. Roskelley

### DNA DAMAGE AND REPAIR

#### MnSOD Promotes Tumor Invasion via Upregulation of FoxM1–MMP2 Axis and Related with Poor Survival and Relapse in Lung Adenocarcinomas

Po-Ming Chen, Tzu-Chin Wu, Shwn-Huey Shieh, Yi-Hui Wu, Min-Chin Li, Gwo-Tarng Shieu, Ya-Wen Cheng, Chih-Yi Chen, and Huei Lee

### ONCOGENES AND TUMOR SUPPRESSORS

#### Molecular Dissection of AKT Activation in Lung Cancer Cell Lines

Yanan Guo, Jinyan Du, and David J. Kwiatkowski

### SIGNAL TRANSDUCTION

#### Neurotransmitter Substance P Mediates Pancreatic Cancer Perineural Invasion via NK-1R in Cancer Cells

Xuqi Li, Guodong Ma, Qingyong Ma, Wei Li, Jiangbo Liu, Liang Han, Wanxing Duan, QinHong Xu, Han Liu, Zheng Wang, Qing Sun, Fenglei Wang, and Erxi Wu

#### Acquisition of the Metastatic Phenotype Is Accompanied by H2O2-Dependent Activation of the p130Cas Signaling Complex

Nadine Hempel, Toni R. Bartling, Badar Mian, and J. Andres Melendez

---

A hallmark of colon cancer is the activation of the Wnt-pathway; however, the HCT116 colon cancer cells do not express nuclear β-catenin despite a gain-of-function mutation in the CTNNB1 gene. As a result, HCT116 cells are sensitive to tumor necrosis factor-α-induced apoptosis. The nuclear (blue) expression of β-catenin (green) could be induced with a GSK3β inhibitor, although a fraction of β-catenin remained at the cell periphery and colocalized with F-actin (red). This induced nuclear expression of β-catenin suppressed the apoptotic response to tumor necrosis factor-α in HCT116 cells. For details, see the article by Han and colleagues on page 207 in this issue.
