# Molecular Cancer Research

## Table of Contents

### Highlights of This Issue 1345

#### REVIEW

- **1347** The Role of Hypoxia and Exploitation of the Hypoxic Environment in Hematologic Malignancies  
  Barbara Muz, Pilar de la Puente, Feda Azab, Micah Luderer, and Abdel Kareem Azab

### DNA DAMAGE AND REPAIR

- **1407** Hypoxia Provokes Base Excision Repair Changes and a Repair-Deficient, Mutator Phenotype in Colorectal Cancer Cells  
  Norman Chan, Mohsin Ali, Gordon P. McCallum, Ramya Kumareswaran, Marianne Koritzinsky, Bradley G. Wouters, Peter G. Wells, Steven Gallinger, and Robert G. Bristow

### CELL CYCLE AND SENESCENCE

- **1355** Viral Oncogene Expression in the Stem/Progenitor Cell Compartment of the Mouse Intestine Induces Adenomatous Polyps  
  Maria Teresa Sáenz Robles, Jean Leon Chong, Christopher Koivisto, Anthony Trimboli, Huayang Liu, Gustavo Leone, and James M. Pipas

### CELL DEATH AND SURVIVAL

- **1365** Selective Protection of Normal Cells during Chemotherapy by Ry4 Peptides  
  Xiao-Rong Wu, Lihua Liu, Zhi-Fu Zhang, Bing Zhang, Hongzhe Sun, Gerald L. Chan, and Na Li

### CHROMATIN, GENE, AND RNA REGULATION

- **1388** EZH2 Represses Target Genes through H3K27-Dependent and H3K27-Independent Mechanisms in Hepatocellular Carcinoma  
  Shu-Bin Gao, Qi-Fan Zheng, Bin Xu, Chang-Bao Pan, Kang-Li Li, Yue Zhao, Qi-Lin Zheng, Xiao Lin, Li-Xiang Yue, and Guang-Hui Jin

### GENOMICS

- **1416** CD44-Mediated Adhesion to Hyaluronic Acid Contributes to Mechanosensing and Invasive Motility  
  Yushan Kim and Sanjay Kumar

### ONCOGENES AND TUMOR SUPPRESSORS

- **1440** Snail Cooperates with KrasG12D In Vivo to Increase Stem Cell Factor and Enhance Mast Cell Infiltration  
  Lawrence M. Knab, Kazumi Ebine, Christina R. Chow, Sania S. Raza, Vaibhav Sahai, Akash P. Patel, Krishan Kumar, David J. Bentrem, Paul J. Grippo, and Hidayatullah G. Munshi

- **1449** Oncogenic Ras/ERK Signaling Activates CDCP1 to Promote Tumor Invasion and Metastasis  
  Takamasu Uekata, Satoko Fujii, Yuri Miyazawa, Reiwa Iwakawa, Mako Narisawa-Saito, Katsuhiko Nakashima, Koji Tsuta, Hitoshi Tsuda, Tohru Kiyono, Jun Yokota, and Ryuichi Sakai

- **1460** Nonamplified FGFR1 Is a Growth Driver in Malignant Pleural Mesothelioma  
  Lindsay A. Marek, Trista K. Hinz, Anne von Mässenhagen, Kyle A. Olszewski, Emily K. Kleczko, Diana Boehm, Mary C. Weiser-Evans, Raphael A. Nemenoff, Hans Hoffmann, Arne Warth, Joseph M. Gozgit, Sven Perner, and Lynn E. Heasley

October 2014 • Volume 12 • Number 10
Table of Contents

1470  Differential Requirement for Src Family Tyrosine Kinases in the Initiation, Progression, and Metastasis of Prostate Cancer
Irwin H. Gelman, Jennifer Peresie, Kevin H. Eng, and Barbara A. Foster

1480  Internalization by Multiple Endocytic Pathways and Lysosomal Processing Impact Maspin-Based Therapeutics
Thomas M. Bodenstine, Richard E. B. Seftor, Elisabeth A. Seftor, Zhila Khalkhali-Ellis, Nicole A. Samii, J. Cesar Monarrez, Grace S. Chandler, Philip A. Pemberton, and Mary J. C. Hendrix

1492  SIGNAL TRANSDUCTION
1492  The Lipid Kinase PI4KIIIβ Is Highly Expressed in Breast Tumors and Activates Akt in Cooperation with Rab11a
Anne A. Morrow, Mohsen Amir Alipour, Dave Bridges, Zemin Yao, Alan R. Saltiel, and Jonathan M. Lee

1509  Targeting TBK1 Inhibits Migration and Resistance to MEK Inhibitors in Mutant NRAS Melanoma
Ha Linh Vu and Andrew E. Aplin

1520  A Macrophage-Dominant PI3K Isoform Controls Hypoxia-Induced HIF1α and HIF2α Stability and Tumor Growth, Angiogenesis, and Metastasis
Shweta Joshi, Alok R. Singh, Muamera Zulcic, and Donald L. Durden

ABOUT THE COVER
Pancreatic ductal adenocarcinoma (PDAC) is associated with a pronounced fibro-inflammatory stromal reaction that contributes to tumor progression. A critical step in invasion and metastasis is the epithelial-to-mesenchymal transition (EMT), which can be regulated by the Snail family of transcription factors. Overexpression of Snail and mutant KrasG12D in the pancreas of transgenic mice causes fibrosis. The cover image shows a pancreatic section from a 3-month-old KrasG12D/Snail mouse that was analyzed for fibrosis using trichrome staining (blue = fibrosis). Please see the article by Knab and colleagues (beginning on page 1440), which demonstrates that Snail also modulates inflammation in the mouse pancreas.
