#### CHROMATIN, GENE, AND RNA REGULATION

878 Dual Promoter Usage as Regulatory Mechanism of let-7c Expression in Leukemic and Solid Tumors
Andrea Pelosi, Silvia Careccia, Giulia Sagrestani, Simona Nanni, Isabella Manni, Valeria Schinzari, Joost H.A. Martens, Antonella Farsetti, Hendrik G. Stunnenberg, Maria Pia Gentileschi, Donatella Del Bufalo, Ruggero De Maria, Giulia Piaggio, and Maria Giulia Rizzo

890 miR-21 Targets 15-PGDH and Promotes Cholangiocarcinoma Growth
Lu Lu, Kathleen Byrnes, Chang Han, Ying Wang, and Tong Wu

#### ONCOGENES AND TUMOR SUPPRESSORS

901 Therapeutic Efficacy of p53 Restoration in Mdm2-Overexpressing Tumors
Qin Li, Yun Zhang, Adel K. El-Naggar, Shushin Xiong, Peirong Yang, James G. Jackson, Gilda Chau, and Guillermina Lozano

912 Nullifying the CDKN2AB Locus Promotes Mutant K-ras Lung Tumorigenesis
Katja Schuster, Niranjan Venkateswaran, Andrea Rabellino, Luc Girard, Samuel Peña-Llopis, and Pier Paolo Scaglioni

924 Targeting Inhibitors of the Tumor Suppressor PP2A for the Treatment of Pancreatic Cancer

#### SIGNAL TRANSDUCTION

940 Identification of mTORC2 as a Necessary Component of HRG/ErbB2-Dependent Cellular Transformation

953 Stress-Induced CXCR4 Promotes Migration and Invasion of Ewing Sarcoma
Melanie A. Krook, Lauren A. Nicholls, Christopher A. Scannell, Rashmi Chugh, Dafydd G. Thomas, and Elizabeth R. Lawlor

ABOUT THE COVER

An aberrant crypt foci (ACF) obtained from the proximal (right) colon shows a distinct serrated morphology similar to that observed in human serrated adenomas (cover image). ACF are considered to represent the earliest macroscopically identifiable abnormality within the colorectal mucosa and can be routinely identified during high-definition chromoendoscopy. Importantly, these small lesions often harbor somatic mutations to colorectal cancer-associated oncogenes, including activating mutations to KRAS and BRAF. Furthermore, ACF provide valuable insight into the earliest stages of colorectal carcinogenesis and may serve as a surrogate marker of future cancer risk. For more information, see the article by Drew and colleagues on page 823.
