## MUC1 Promoter–Driven DTA as a Targeted Therapeutic Strategy against Pancreatic Cancer

Table of Contents

538  Survival Outcome and EMT Suppression Mediated by a Lectin Domain Interaction of Endo180 and CD147

548  A Vascular Model of Tsc1 Deficiency Accelerates Renal Tumor Formation with Accompanying Hemangiosarcomas
Jarrett D. Leech, Stephen H.T. Lammers, Sam Goldman, Neil Auricchio, Roderick T. Bronson, David J. Kwiatkowski, and Mustafa Sahin

SIGNAL TRANSDUCTION

556  HIF1α Regulates mTOR Signaling and Viability of Prostate Cancer Stem Cells
Maximilian Marhold, Erwin Tomasich, Ahmed El-Gazzar, Gerwin Heller, Andreas Spittler, Reinhard Horvat, Michael Krainer, and Peter Horak

565  miR-629 Targets TRIM33 to Promote TGFβ/Smad Signaling and Metastatic Phenotypes in ccRCC
Kentaro Jingushi, Yuko Ueda, Kaori Kitae, Hiroaki Hase, Yoshi Egawa, Ikumi Ohshio, Ryoji Kawakami, Yuri Kashiyagi, Yohei Tsukada, Takumi Kobayashi, Wataru Nakata, Kazutoshi Fujita, Motohide Uemura, Norio Nomomura, and Kazutake Tsujikawa

575  The TWEAK Receptor Fn14 Is an Src-Inducible Protein and a Positive Regulator of Src-Driven Cell Invasion
Emily Cheng, Timothy G. Whitsett, Nhan L. Tran, and Jeffrey A. Winkles

584  p53 Mutation Directs AURKA Overexpression via miR-25 and FBXW7 in Prostatic Small Cell Neuroendocrine Carcinoma
Zhen Li, Yin Sun, Xufeng Chen, Jill Squires, Behdokht Nowroozizadeh, Chaozhao Liang, and Jiaoti Huang

ABOUT THE COVER

Tuberous sclerosis complex (TSC) is associated with hamartomas in several organs in patients, including the brain, kidneys, heart, and skin. The cover shows hematoxylin and eosin staining of a paw section from an 8-week-old wild-type mouse. At the same age, Tsc1cc DARPP Cre mouse displays paw lesions with multiple hemangiosarcomas. Please see the article by Leech and colleagues (beginning on page 548) for more information.
