

## Highlights of This Issue 587

## REVIEW

- 589** Insights into the Genetic Basis of the Renal Cell Carcinomas from The Cancer Genome Atlas  
Scott M. Haake, Jamie D. Weyandt, and W. Kimryn Rathmell

## CELL DEATH AND SURVIVAL

- 599** HuR Contributes to TRAIL Resistance by Restricting Death Receptor 4 Expression in Pancreatic Cancer Cells  
Carmella Romeo, Matthew C. Weber, Mahsa Zarei, Danielle DeCicco, Saswati N. Chand, Angie D. Lobo, Jordan M. Winter, Janet A. Sawicki, Jonathan N. Sachs, Nicole Meisner-Kober, Charles J. Yeo, Rajanikanth Vadigepalli, Mark L. Tykocinski, and Jonathan R. Brody

## DNA DAMAGE AND REPAIR

- 612** Oxidative Stress–Induced Protein Damage Inhibits DNA Repair and Determines Mutation Risk and Therapeutic Efficacy  
Elizabeth McAdam, Reto Brem, and Peter Karran

## GENOMICS

- 623** Expression of *ANRIL*–Polycomb Complexes–*CDKN2A/B/ARF* Genes in Breast Tumors: Identification of a Two-Gene (*EZH2/CBX7*) Signature with Independent Prognostic Value  
Didier Meseure, Sophie Vacher, Kinan Drak Alsibai, Andre Nicolas, Walid Chemlali, Martial Caly, Rosette Lidereau, Eric Pasmant, Celine Callens, and Ivan Bieche

## ONCOGENES AND TUMOR SUPPRESSORS

- 634** PCBP1/HNRNP E1 Protects Chromosomal Integrity by Translational Regulation of CDC27  
Laura A. Link, Breege V. Howley, George S. Hussey, and Philip H. Howe

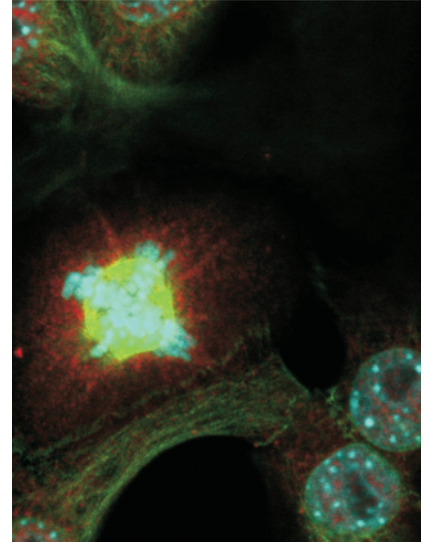

## SIGNAL TRANSDUCTION

- 647** Dysregulation of WNT5A/ROR2 Signaling Characterizes the Progression of Barrett-Associated Esophageal Adenocarcinoma  
Orestis Lyros, Linghui Nie, Tami Moore, Rituparna Medda, Mary Otterson, Behnaz Behmaram, Alexander Mackinnon, Ines Gockel, Reza Shaker, and Parvaneh Rafiee
- 660** Distinct Effects of Adipose-Derived Stem Cells and Adipocytes on Normal and Cancer Cell Hierarchy  
Manjushree Anjanappa, Riesa Burnett, Michael A. Zieger, Stephanie Merfeld-Clauss, William Wooden, Keith March, Sunil Tholpady, and Harikrishna Nakshatri

# Table of Contents

## ABOUT THE COVER

Loss of HNRNP E1-dependent regulation of CDC27 translation leads to constitutive CDC27 expression, resulting in mitotic aberrations and aneuploidy in NMuMG cells. Confocal immunofluorescence microscopy was performed on fixed, asynchronous NMuMG cells constitutively expressing CDC27 (NMuMG-CDC27) using anti-alpha tubulin, anti-HNRNP E1, and DAPI to visualize mitoses. Mitotic aberrations were observed in NMuMG-CDC27 cells, while parental control cells exhibited normal mitoses, suggesting that cell cycle-dependent regulation of CDC27 expression is important in maintaining genomic integrity. For more information, see the article by Link and colleagues beginning on page 634.
