501 Dysregulated GPCR Signaling and Therapeutic Options in Uveal Melanoma
Vivian Chua, Dominic Lapadula, Clinita Randolph, Jeffrey L. Benovic, Philip B. Wedegaertner, and Andrew E. Aplin

CELL CYCLE AND SENESCENCE

507 Mutant IDH1 Disrupts the Mouse Subventricular Zone and Alters Brain Tumor Progression
Christopher J. Pirozzi, Austin B. Carpenter, Matthew S. Waltkus, Catherine Y. Wang, Huishan Zhu, Landon J. Hansen, Lee H. Chen, Paula K. Greer, Jei Feng, Yu Wang, Cheryl B. Bock, Ping Fan, Ivan Spasojevic, Roger E. McLendon, Darell D. Bigner, Yiping He, and Hai Yan

CELL DEATH AND SURVIVAL

521 Exploiting AR-Regulated Drug Transport to Induce Sensitivity to the Survivin Inhibitor YM155

CHROMATIN, EPIGENETICS, AND RNA REGULATION

532 Prognostic Relevance of Tumor Purity and Interaction with MGMT Methylation in Glioblastoma
Eva Schulze Heuling, Felix Knab, Josefine Radke, Eskil Ekelsson, Emmanuel Martinez-Ledesma, Arend Koch, Marcus Crabsen, Christoph Dieterich, Roel G. Verhaak, Christoph Harms, and Philipp Euskirchen

GENOMICS

Distinctive Histogenesis and Immunological Microenvironment Based on Transcriptional Profiles of Follicular Dendritic Cell Sarcomas
Maria Antonella Lagnestra, Claudio Tripodo, Claudio Agostinelli, Giovanna Motta, Sylvia Hartmann, Claudia Doring, Maura Rossi, Federica Melle, Maria Rosania Sapinanza, Valentina Tabanelli, Alessandro Pileri, Fabio Fuligni, Anna Gazzola, Claudia Mannu, Carlo Alberto Sagramoso, Silvia Lonardi, Luisa Lorenzi, Francesco Bacci, Elena Sabattini, Anita Borges, Ingrid Simonitch-Klupp, Jose Cabecadas, Elias Campo, Juan Rosai, Martin-Leo Hansmann, Fabio Facchetti, and Stefano Aldo Pileri

541 Genome-Wide Analysis Identifies MEN1 and MAX Mutations and a Neuroendocrine-Like Molecular Heterogeneity in Quadruple WT GIST

553 Comprehensive Transcripome and Mutational Profiling of Endemic Burkitt Lymphoma Reveals EBV Type-Specific Differences
Yasin Kaymaz, Cliff I. Oduor, Hongbo Yu, Juliana A. Otieno, John Michael Ong'e'cha, Ann M. Moormann, and Jeffrey A. Bailey

563 Comprehensive Transcriptome and Mutational Profiling of Endemic Burkitt Lymphoma Reveals EBV Type-Specific Differences
Yasin Kaymaz, Cliff I. Oduor, Hongbo Yu, Juliana A. Otieno, John Michael Ong'e'cha, Ann M. Moormann, and Jeffrey A. Bailey

577 Novel Assay to Detect RNA Polymerase I Activity In Vivo
Gunes Guner, Paul Sirajuddin, Qizhi Zheng, Baoyan Bai, Alexandra Brodie, Hester Liu, Taija af Hällström, Ibrahim Kulp, Marikki Laiho, and Angelo M. De Marzo
ONCOGENES AND TUMOR SUPPRESSORS

585 Tumor-induced Stromal STAT1 Accelerates Breast Cancer via Deregulating Tissue Homeostasis
Victoria R. Zellmer, Patricia M. Schneppe, Sarah L. Fracci, Xuejuan Tan, Erin N. Howe, and Siyuan Zhang

SIGNAL TRANSDUCTION

598 Combined TRAF6 Targeting and Proteasome Blockade Has Anti-myeloma and Anti-Bone Resorptive Effects
Haiming Chen, Mingjie Li, Eric Sanchez, Cathy S. Wang, Tiffany Lee, Camilia M. Soof, Christian E. Casas, Jasmin Cao, Colin Xie, Kyle A. Udd, Kevin DeCorso, George Y. Tang, Tanya M. Spektor, and James R. Berenson

610 Constitutive Phosphorylation of STAT3 by the CK2–BLNK–CD5 Complex
Uri Rozovski, David M. Harris, Ping Li, Zhiming Liu, Preetesh Jain, Ivo Veletic, Alessandra Ferrajoli, Jan Burger, Susan O'Brien, Pithviraj Bose, Philip Thompson, Nitin Jain, William Wierda, Michael J. Keating, and Zeev Estrov

619 A Transcriptional Program for Detecting TGFβ-Induced EMT in Cancer
Momeneh Foroutan, Joseph Cursons, Soroosh Hediyeh-Zadeh, Erik W. Thompson, and Melissa J. Davis

ABOUT THE COVER

In this issue, Kaymaz and colleagues (beginning on page 563) investigate transcriptome expression and mutational profiles of patient-derived endemic Burkitt lymphoma (BL) tumors using RNA sequencing. The cover image shows the unsupervised hierarchical clustering heatmap of BL tumors based on their expression profiles of the most variant genes. While 2 sporadic BLs separate out from 28 endemic BLs, eBL tumor expression profiles demonstrate greater correlation within eBLs compared with sBLs. Transcriptome-wide gene expression correlations between eBLs did not reveal significant groupings suggesting that eBL tumors are relatively homogeneous with no major underlying molecular phenotypes. Based on further analysis, the study reveals subtler differences in terms of gene expression as well as the pattern of somatic mutations that correlates EBV presence and EBV type in the tumor B cells.
