# Contents

## Highlights of This Issue

### EDITORIAL

**3**

**Middlegame Theory, Cancer Style: A Message from the Editor-in-Chief**

Karen E. Knudsen

### REVIEW

**5**

**Radiation Survivors: Understanding and Exploiting the Phenotype following Fractionated Radiation Therapy**

Adeola Y. Makinde, Molykutty John-Aryankalayil, Sanjeewani T. Palayoor, David Cerna, and C. Norman Coleman

### PERSPECTIVE

**13**

**Predicting Enhanced Cell Killing through PARP Inhibition**

Julie K. Horton and Samuel H. Wilson

## CHROMATIN, GENE, AND RNA REGULATION

**43**

**The Novel miR-7515 Decreases the Proliferation and Migration of Human Lung Cancer Cells by Targeting c-Met**

Ji Min Lee, Jung Ki Yoo, Hanna Yoo, Ho Yong Jung, Dong Ryul Lee, Hye Cheol Jeong, Seoung Hun Oh, Hyung Min Chung, and Jin Kyeoung Kim

**54**

**Contribution of HIF-1α in 4E-BPI Gene Expression**

Rania Azar, Charline Lasfargues, Corinne Bousquet, and Stéphane Pyronnet

## ONCOGENES AND TUMOR SUPPRESSORS

**62**

**Targeted Inactivation of HDAC2 Restores p16INK4A Activity and Exerts Antitumor Effects on Human Gastric Cancer**

Jeong Kyu Kim, Ji Heon Noh, Jung Woo Eun, Kwang Hwa Jung, Hyun Jin Bae, Qingyu Shen, Min Gyu Kim, Young Gyoon Chang, Seung-Jin Kim, Won Sang Park, Jung Young Lee, Jurgen Borlak, and Suk Woo Nam

## CELL CYCLE AND SENECEENCE

**19**

**Human Papilloma Virus (HPV) E7-Mediated Attenuation of Retinoblastoma (Rb) Induces hPygopus2 Expression via Elf-1 in Cervical Cancer**

## SIGNAL TRANSDUCTION

**74**

**Multiple Functions of Sushi Domain Containing 2 (SUSD2) in Breast Tumorigenesis**

Allison P. Watson, Rick L. Evans, and Kristi A. Egland

**86**

**Regulation of CXCR4-Mediated Invasion by DARPP-32 in Gastric Cancer Cells**

Sheoumin Zhu, Jun Hong, Manish K Tripathi, Vikas Sehdev, Abbes Belkhiri, and Wael El-Rifai

**95**

**Genetic Ablation of the Tetraspanin CD151 Reduces Spontaneous Metastatic Spread of Prostate Cancer in the TRAMP Model**

Ben T. Copeland, Matthew J. Bowman, and Leonie K. Ashman

Defining the Molecular Basis of Malignancy and Progression www.aacrjournals.org
ABOUT THE COVER

SUSD2 (Sushi Domain Containing 2) is a membrane surface protein that plays a role in immune evasion promoting breast tumorigenesis. Immunohistochemical analysis of SUSD2 in benign breast tissue was performed using an anti-SUSD2 antibody followed by counterstaining with hematoxylin. Brown stain indicates the presence of SUSD2. Weak to no staining was observed in normal epithelial cells of benign ducts and lobules; however, staining was present in the endothelial cells lining blood vessels. For further details, please see Watson and colleagues on page 74 in this issue.
