Molecular Cancer Research

Scope
Molecular Cancer Research publishes articles describing novel basic cancer research discoveries of broad interest to the field. Studies must be of demonstrated significance, and the journal prioritizes analyses performed at the molecular and cellular level that reveal novel mechanistic insight into pathways and processes linked to cancer risk, development, and/or progression. Areas of emphasis include all cancer-associated pathways (including cell-cycle regulation; cell death; chromatin regulation; DNA damage and repair; gene and RNA regulation; genomics; metabolism; oncogenes and tumor suppressors; and signal transduction), in addition to studies describing new molecular mechanisms and interactions that support cancer phenotypes.

Submission of Manuscripts
Online manuscript submission is welcomed at http://mcr.manuscriptcentral.com. Before submitting a manuscript, please read the Instructions for Authors, which is available from the Journal’s home page at http://mcr.aacrjournals.org.

Publication Charges
Beginning with manuscripts submitted January 1, 2016 or after, articles will be published with the understanding that the author(s) will pay both a publication fee plus a color figure handling fee. Please see the Instructions for Authors, which are available from the Journal’s home page at http://mcr.aacrjournals.org.

Advertising Information
For information about advertising in AACR journals, contact Pharmaceutical Media Inc., 30 East 33rd St., 4th Floor, NY, NY, 10016; 212-904-0374; mperlowitz@pminy.com.

Copyright and Permissions
Content printed in or disseminated by Molecular Cancer Research is protected by copyright. Authors who wish to publish material in Molecular Cancer Research must formally transfer copyright to the AACR. All authors must sign copyright transfer forms before the AACR can proceed with publication.
