

Highlights of This Issue 667

- 669** Tyrosine Phosphorylation of p27Kip1 Correlates with Palbociclib Responsiveness in Breast Cancer Tumor Cells Grown in Explant Culture
Susan R.S. Gottesman, Jonathan Somma, Vladislav Tsperson, Lisa Dresner, Usha Govindarajulu, Priyank Patel, and Stacy W. Blain

CANCER GENES AND NETWORKS

- 676** Discovery and Characterization of Recurrent, Targetable ALK Fusions in Leiomyosarcoma
Lara E. Davis, Kevin D. Nusser, Joanna Przybyl, Janét Pittsenbarger, Nicolle E. Hofmann, Sushama Varma, Sujay Vennam, Maria Debiec-Rychter, Matt van de Rijn, and Monika A. Davare
- 686** Epigenetic Regulation of *Dlg1*, via *Kaiso*, Alters Mitotic Spindle Polarity and Promotes Intestinal Tumorigenesis
Madeleine A. Young, Stephanie May, Angelos Damo, Young So Yoon, Man-Wook Hur, Wojciech Swat, and Lee Parry
- 697** *Growth Factor-Independent 1* Is a Tumor Suppressor Gene in Colorectal Cancer
Min-Shan Chen, Yuan-Hung Lo, Xi Chen, Christopher S. Williams, Jessica M. Donnelly, Zachary K. Criss II, Shreena Patel, Joann M. Butkus, Julien Dubrulle, Milton J. Finegold, and Noah F. Shroyer
- 709** The Tumor Suppressor FBW7 and the Vitamin D Receptor Are Mutual Cofactors in Protein Turnover and Transcriptional Regulation
Reyhaneh Salehi-Tabar, Babak Memari, Hilary Wong, Vassil Dimitrov, Natacha Rochel, and John H. White

CANCER "-OMICS"

- 720** CREBBP/EP300 Bromodomain Inhibition Affects the Proliferation of AR-Positive Breast Cancer Cell Lines
Veronica Garcia-Carpizo, Sergio Ruiz-Llorente, Jacinto Sarmentero, Ana González-Corpas, and Maria J. Barrero
- 731** Multiclonality and Marked Branched Evolution of Low-Grade Endometrioid Endometrial Carcinoma
Lorena Lazo de la Vega, Mia C. Samaha, Kevin Hu, Nolan R. Bick, Javed Siddiqui, Daniel H. Hovelson, Chia-Jen Liu, Cody S. Carter, Kathleen R. Cho, Andrew P. Sciallis, and Scott A. Tomlins

CELL FATE DECISIONS

- 741** Ovarian Tumor Cell Expression of Claudin-4 Reduces Apoptotic Response to Paclitaxel
Christopher Breed, Douglas A. Hicks, Patricia G. Webb, Carly E. Galimanis, Benjamin G. Bitler, Kian Behbakht, and Heidi K. Baumgartner
- 751** Combinations of Tyrosine Kinase Inhibitor and ERAD Inhibitor Promote Oxidative Stress-Induced Apoptosis through ATF4 and KLF9 in Medullary Thyroid Cancer
Rozita Bagheri-Yarmand, Krishna M. Sinha, Ling Li, Yue Lu, Gilbert J. Cote, Steven I. Sherman, and Robert F. Gagel

GENOME MAINTENANCE

- 761** NF- κ B and Poly (ADP-ribose) Polymerase 1 Form a Positive Feedback Loop that Regulates DNA Repair in Acute Myeloid Leukemia Cells
Ding Li, Yufei Luo, Xianling Chen, LingYu Zhang, Tingting Wang, Yingting Zhuang, Yingjuan Fan, Jianhua Xu, Yuanzhong Chen, and Lixian Wu
- 773** The Antitumor Drugs Trabectedin and Lurbinectedin Induce Transcription-Dependent Replication Stress and Genome Instability
Emanuela Tumini, Emilia Herrera-Moyano, Marta San Martín-Alonso, Sonia Barroso, Carlos M. Galmarini, and Andrés Aguilera

Table of Contents

SIGNAL TRANSDUCTION AND FUNCTIONAL IMAGING

783 CCL2 Is a Vascular Permeability Factor Inducing CCR2-Dependent Endothelial Retraction during Lung Metastasis

Marko Roblek, Darya Protsyuk, Paul F. Becker, Cristina Stefanescu, Christian Gorzelanny, Jesus F. Glaus Garzon, Lucia Knopfova, Mathias Heikenwalder, Bruno Luckow, Stefan W. Schneider, and Lubor Borsig

794 Reactive Oxygen Species (ROS)-Inducing Triterpenoid Inhibits Rhabdomyosarcoma Cell and Tumor Growth through Targeting Sp Transcription Factors

Ravi Kasiappan, Indira Jutooru, Kumaravel Mohankumar, Keshav Karki, Alexandra Lacey, and Stephen Safe

TUMOR MICROENVIRONMENT AND IMMUNOBIOLOGY

806 Interactions with Muscle Cells Boost Fusion, Stemness, and Drug Resistance of Prostate Cancer Cells

Berna Uygur, Evgenia Leikina, Kamran Melikov, Rafael Villasmil, Santosh K. Verma, Calvin P.H. Vary, and Leonid V. Chernomordik

821 Periprostatic Adipose Tissue Favors Prostate Cancer Cell Invasion in an Obesity-Dependent Manner: Role of Oxidative Stress

Victor Laurent, Aurélie Toulet, Camille Attané, Delphine Milhas, Stéphanie Dauvillier, Falek Zaidi, Emily Clement, Mathieu Cinato, Sophie Le Gonidec, Adrien Guérard, Camille Lehuédé, David Garandeau, Laurence Nieto, Edith Renaud-Gabardos, Anne-Catherine Prats, Philippe Valet, Bernard Malavaud, and Catherine Muller

ABOUT THE COVER

Epigenetic control of cellular polarity has recently come under scrutiny as a potential driver of tumorigenesis and progression. The cover shows a whole mount immunofluorescence image of an intestinal cell organoid in which the scaffold protein Dlg1 had been disrupted (green: phalloidin; red: lysozyme; blue: DAPI). Loss of Dlg1 does not affect the cells' ability to maintain polarity, but rather causes improper orientation of the mitotic spindle and loss of planar cell division, causing increased dwelling time in intestinal crypts. The authors suggest that delayed exit from the crypts allows for additional time to accumulate and retain mutations without increasing the overall mutation rate, thus contributing to a "tumor-permissive" environment in the intestine. Please see the article by Young and colleagues (beginning on page 686) for more information.
