

Supplementary Figure S1. Nocodazole synchronization for GBM CSCs. Representative cell cycle profiles for CSCs from GBM 3832 (**a**), 3691 (**b**), and 08-387 (**c**) 20-30 minutes (m) post-release when cells are enriched in mitosis (G2/M) and 4-6 hours (h) post-release when cell are enriched in early G1 (G1/G0).
