

Supplementary Figure S1

Supplementary Fig. S1. Effect of IQGAP2 expression on angiogenic regulators. Bar graph shows fold change (RT-PCR) in angiogenic regulators in MCF7 cells having IQGAP2 depletion (IQGAP2_KD) and MDA-MB-468 cells having IQGAP2 depletion (IQGAP2_KD). X-axis shows name of cells or genes and Y-axis shows fold change in the genes compared to their respective control. The results are presented as mean \pm SD values from three independent experiments.
